

Arts and Sciences Curriculum Committee (ASCC)

Report for the ASC Faculty Senate 2011 – 2012

For activities from August 24, 2011 through July 2, 2012

A. Curricular and Assessment Initiatives

General Education

- The Assessment Panel finalized the guidelines to submit GE Education Abroad courses (with mandatory reflection assignment and scoring rubric).
- The Assessment Panel and the full ASCC were briefed about a GE assessment project that involves CARMEN and is currently being developed in collaboration with the OCIO. Valerie Rake visited the Assessment Panel on January 20, 2012 and the ASCC on February 10, 2012 to present a preliminary model and answer questions. ASCC agreed to continue working on the project with OCIO.
- Throughout the Winter and Spring quarters, the Assessment Panel revised the GE goals and expected learning outcomes. The purpose was to simplify the language and make the expected learning outcomes more assessable. Subsequently, the divisional Panels provided input. On June 8, 2012, the full ASCC voted to approve these revised GE goals and expected learning outcomes.
- On April 3, 2012, the NMS Panel developed guidelines distinguishing GE Natural Science courses for BA/BS students from GE Natural Science courses for BA students only. These guidelines were officially approved via e-vote by the NMS Panel on April 18, 2012, and subsequently voted on by the full ASCC on April 20, 2012.

Calendar Conversion and Implementation

- On January 13, 2012, ASCC revised and approved the faculty rules governing undergraduate degrees in Arts and Sciences under semesters: general college/degree rules, rules governing majors, rules governing minors.
- The ASCC was updated on various conversion (GE) issues affecting advisors and approved some policy clarifications by formal vote.
 - ASCC reviewed the updated GE advising sheets.
 - Formal votes on 3-9-12:
 - Students returning after a period of absence (except for summer) will immediately transition to GE (i.e., zero year transition) and advisor discretion will be used whenever necessary. Going forward, students who begin on semesters and are away from the university for a period of time (except for summer) will return under the same curriculum that was in effect when they left, unless they are gone 4 years or longer.
 - In those cases where students will fall short of 30 semester hours on the major when their quarter courses are converted and the transition plan does not address the issue, graduation should be based on course-to-course count rather than credit hours.
 - Recommendation to ASC Faculty Senate on 6-8-12: Maintain principle of GEC-R that under the Open Option Math courses need to be beyond the minimum requirement for the BA or BS (whichever applies).
 - When the GE was developed, ULAC and CCI settled on a 10-hour requirement for GE Natural Science courses so that students would have to take 3 courses to meet that requirement

rather than just 2. However, some 5-hour GE Natural Science courses now exist under semesters (e.g., Molecular Genetics 1101). Thus, students may well reach the 10-hour requirement by taking 2 courses, instead of 3. The ASCC was informed of this and will keep monitoring the issue.

Double Majors

- On 4-6-12, the ASCC was updated by John Wanzer about a proposal that would make it easier for students to add a major in another college to the degree they are already completing, without necessarily completing all the GE requirements for the second degree. The proposal suggests that we extend, for more general use, the ASC rules for double majors. The ASCC voted to support further development of the proposal.

Discussion of Curricular Flow Process

- The ASCC was briefed about a proposal in the ASC Faculty Senate to eliminate the oversight of any new course proposal not seeking GE credit from the ASCC. Such courses would proceed directly from departments to OAA passing through the appropriate ASC staff persons. (This proposal was subsequently rejected by the ASC Faculty Senate.)

Freshman Seminars

- A separate report on Freshman Seminars will be submitted by the Freshman Seminars program.

B. Quarter Programs

Minor Quarter Revisions

Global Public Health Minor (name change)

Slavic Languages and Cultures Minor (name change)

C. Semester Programs

Converted or Re-envisioned Majors

ASC

Re-envisioned - Social Sciences Air Transportation BA (formerly: SBS Aviation BA)

The quarter-based SBS Aviation major program had drifted substantially from the objectives that were the bases for its establishment in 1982, and these curricular changes over time had resulted in a program that was seriously deficient pedagogically in terms of any social science discipline. Indeed, over time, fewer and fewer social science courses were part of the SBS Aviation curriculum as preparation for pilot certification became a greater focus of the program. The purpose of the re-envisioned conversion is to reshape the SBS Aviation curriculum so that students who declare a social sciences Aviation major may be assured that they will receive a social sciences approach to understanding the way in which air transportation systems affect and are affected by governments and their policies. Air transportation is an important consideration for national and international policymakers especially with respect to security, trade, and recovery/rebuilding following disasters. Much scholarship in this field is also being carried out.

Dual degrees with FCOB

BSBA-BA

BSBA-BS

Major Semester Revisions

Actuarial Science BA and BS; Mathematics BA and BS

A few changes to the major conversions as previously approved by CAA were made. For all four majors, restrictions to the double-counting of some courses in cases of dual degrees were introduced. For Math majors, a required 1-credit Introductory Seminar (Math 1295) was also introduced. A few minor errors were corrected in all four majors.

Speech and Hearing BA

A few changes to the major conversion as previously approved by CAA were made. Two additional pre-major courses were introduced. Pre-majors must now complete three courses (SHS 2230, 3320, and 3340) with a grade of C- or better. Furthermore, three specific GE courses are now required in Mathematics, Natural Sciences, and Lifespan Development. Finally, two courses in the actual major were replaced with two other courses.

New Semester Minors

Air Science Minor

Geographic Information Science Minor

Naval Science Minor

Physical Activity Specialist Minor

Converted Minors

ASC

Cognitive Science Minor

Critical and Cultural Theory Minor

Neuroscience Minor

Non-ASC minors approved for ASC students

Aviation Minor

City and Regional Planning Minor

Re-envisioned – Community Outreach Education Minor (formerly: Agricultural and Extension Education Minor)

Environmental Engineering Minor

Global Public Health Minor

Military Science Minor

Nuclear Engineering Minor

Surveying and Mapping Minor

Deactivated Minor

Exercise Science Minor

Minor Semester Revisions

Mathematics Minor (regular and honors)

Other Converted Program

Associate of Arts
