Report for the ASC Faculty Senate

For activities from July 1, 2021 through June 30, 2022

## **A. Curricular and Assessment Initiatives**

### **New General Education**

#### **1. Foundation: Race, Ethnicity and Gender Diversity**

In September and October, Chair Luke Wilson communicated to the committee the concern of the ASC Senate's general body regarding the number of approved courses in the new General Education. The GEN Foundation: Race, Ethnicity, and Gender Diversity category was of particular concern since this would be the only GEN Foundations category that all or most students would need when entering the university and would thus have the highest demand. (The other six GEN Foundations are available for credit via transfer credit/CCP at other institutions, Advanced Placement testing, or International Baccalaureate testing, and thus many students enter the university with credit for courses in these categories.) Additionally, REGD was the only GEN Foundation category that did not have any courses rolled over from the Legacy GE. It was determined that approx. 4,860 seats (or 162 sections of 30 seats each) would be needed to fill demand in the REGD category for AU22. [Note: This did not end up being a problem. In AU22, across all campuses, the university enrolled 7,117 students in 46 distinct REGD courses.]

#### **2. Bookend: Launch Seminar**

- Meg Daly (Associate Dean for Undergraduate Education) and Sarah Holt (Sr. Instructional Designer—ODEE) presented the Carmen shell for the 1<sup>st</sup> bookend course on November 19<sup>th</sup>, 2021. The full ASCC was chosen to review this course since it does not fall under the purview of any ASCC Panel or other University governing body. The ASCC declined to vote on the course at this meeting and asked that a syllabus be provided in conjunction with the Carmen shell.
- On Dec. 3<sup>rd</sup> and Dec. 17<sup>th</sup>, 2022, the ASCC considered the course again, voting to approve the course with five contingencies. They asked that OAA add content pertaining to (1) the history and mission of land grant institutions and how they intersect with expropriation of land belonging to native peoples and concepts of citizenship, (2) the rationale behind the GEN categories, and (3) preferably live interaction with faculty members who teach in the GEN. They also asked that OAA provide more information about how they will support faculty who contribute to the project and asked for an explanation of how the course evolved without the direct faculty involvement that was laid out in the New General Education Implementation Report.
- On Jan. 21<sup>st</sup>, 2022, the ASCC responded to a clarifying question posed by OAA in response to one of their contingencies regarding faculty involvement, and ASCC provided additional suggestions and direction.
- On Feb. 4<sup>th</sup>, 2022, Meg Daly again visited the ASCC to solicit input and discuss the faculty involvement with the course. The course was fully approved on Feb. 18<sup>th</sup>, 2022

### 3. New General Education Assessment

On May 6<sup>th</sup>, 2022, Meg Daly and Alan Kalish (Assistant Vice Provost—Undergraduate Education) presented the new General Education Assessment Plan to the ASCC as an informational update. The New General Education program will be assessed by category.

#### Upper/Lower Division Courses in ASC

On Feb. 4<sup>th</sup>, 2022, the Committee began discussions about an issue presented by a course change request for a cross-listed course from History, Earth Sciences, and Evolution, Ecology and Organismal Biology (EEOB). This triple-listed course was a 1000 level course, but the units requested to move it to the 2000 level. This created an issue because 2000 level courses in the Physical Sciences are considered upper-division, but 2000-level courses in other departments are not. After consultation with the departments involved, the Committee voted on April 22<sup>nd</sup>, 2022 to amend the ASC Faculty Rules to include a “carve out” for Earth Science 2911 (formerly 1911), denoting it as a lower-division course. This exception will only come into effect if Earth Science 1911 fully goes through the process of becoming 2911. [Note: As of December 1, 2022, the School of Earth Sciences and the other two units have not resubmitted the course to request the renumbering and addition of some GEN categories.]

#### First-Year Seminar Instruction

On Feb. 18<sup>th</sup>, 2022, the Committee considered a question posed by a faculty member about the First-Year Seminars. Specifically, the faculty member asked for permission to assign a graduate student as the instructor of a First-Year Seminar that they created. The ASCC declined this request, maintaining that one of the core tenants of the First-Year Seminar program is allowing first-year students to build a relationship with a faculty member.

#### Distance Learning Considerations

On March 4<sup>th</sup>, 2022, the Committee discussed the utilization of outside curricular sources (e.g., a course designed by a faculty member at another institution) for distance learning courses at Ohio State. The concern centered around how many contact hours students would have with an Ohio State instructor. It was noted that there are no clear university guidelines to address such situations.

#### Bachelor of Arts and Bachelor of Science Degree Requirements

- The Ohio Department of Higher Education has an expectation that the General Education reflect some difference between the Bachelor of Arts and the Bachelor of Science. On December 3<sup>rd</sup>, 2021, the ASCC discussed how this should be implemented in the New General Education. In the previous iteration of the General Education, students who did a Bachelor of Science were required to complete Math 1141 or 1151 or higher (Calculus I) and complete more rigorous Natural Science courses (chosen from an approved list) as well as two Natural Science courses with laboratory components (one biological and one physical). While the Committee considered a number of options, they decided that the most feasible option for students entering the university in Autumn of 2022 was to preserve the BS requirement for Calculus I (Math 1141 or 1151 or higher) and abandon the expectation for BS students to have additional and/or more rigorous GEN science requirements.
- The Committee also noted that this is to be considered a temporary measure, and they would like to revisit this topic in the future. ASC will investigate how peer institutions approach this distinction for later consideration. Some Committee members noted that other institutions require BA students to take an additional humanities course and BS students to take an additional natural science course, but the Committee hesitated to add

General Education requirements, as one of the primary goals of the New General Education program was to have a consistent GEN across all colleges.

### **Proposal to Rename Education Abroad and Away High Impact Practice in New General Education**

On April 22<sup>nd</sup>, 2022, the Committee provided feedback to the Office of Academic Affairs and the Office of International Affairs on a proposal to re-name one of the new General Education High Impact Practices (HIP). The proposal aimed to better center the name of the HIP category on “Global and Intercultural Learning” as OAA and OIA felt that this would be more in line with the learning outcomes for this HIP, which can in fact be achieved without traveling. This would also allow for courses in the COIL (Collaborative Online International Learning) program to be added to GEN Themes. The committee was supportive of COIL courses in general but also expressed some concern that inclusion of COIL courses in this HIP category might discourage travel abroad or widen the gap between students who can afford to study abroad and those who cannot. They suggested that the new name be “Global and Intercultural Learning: Abroad, Away or Virtual” to be clear about which types of courses could be included in the HIP.

### **Revision to the ASC Honors Program**

The ASCC voted to endorse the newly proposed ASC Honors Program Requirements as presented by Douglas Crews (Chair, ASC Honors Committee) and Lindsey Chamberlain (Assistant Dean of Academic Enrichment) on April 22<sup>nd</sup>, 2022

### **Development of a Model DL syllabus**

Mike Vasey, representing SBS Panel Chair Mat Coleman, presented a model Distance Learning syllabus to the ASCC on May 6<sup>th</sup>, 2022. The SBS Panel had developed this model syllabus to supplement the template provided by the ASC Office of Distance Education, with an eye to showing faculty in departments what an ideal DL syllabus might look like.

### **Election of a New Chair**

On April 22<sup>nd</sup>, 2022, Brad Steinmetz (Department of Theatre, Film, and Media Arts) was nominated to serve as the new Chair of the ASCC. He was elected to this role via e-vote prior to the May 6<sup>th</sup> meeting of the ASCC.

### **First-year Seminars**

A separate report on First-year Seminars will be submitted by the First-year Seminars program.

## **B. Programs**
